

# Fast LNG

**Project: Fast LNG**

**Location: Ingleside, TX**

**Owner: New Fortress Energy**

**Contractor: MMR Constructors, Inc**

**MEIS Support/Supplies: August 2022 through Present Day**

- Fast LNG is NFE's innovative, offshore liquefaction solution. Fast LNG harnesses existing FLNG (floating liquefied natural gas) technology and combines it with a modular approach, allowing for scalability, affordability, and speed of natural gas liquefaction. Not only that, but offshore means NFE can bring their pioneering capabilities to just about any coast, making LNG more accessible for markets worldwide.
- Faster, cheaper & cleaner - that's the positive power of Fast LNG.
- Fast LNG will be a game-changer for the efficient liquefaction of LNG, and we're proud to play our part in pioneering this advancement for NFE's customers.
