

# Golden Pass LNG

**Project:** Golden Pass LNG Project

**Location:** Sabine Pass, TX

**Owner:** ExxonMobil & QatarEnergy

**Contractor:** Zachry Industrial

**MEIS Support/Supplies:** February 2023 through Present Day

- Golden Pass LNG is adding liquefaction and export capabilities to its existing facility in Sabine Pass, Texas. This will provide the flexibility to import and export natural gas in response to market conditions. Train 1 is expected to start up in the second half of 2024.
- The project's estimated send out capacity will be around 18 million tons of LNG per year. The new facility will utilize the existing state-of-the-art tanks, berths and pipeline infrastructure. In addition, new facilities for natural gas pre-treatment and liquefaction will also be constructed.
- The expansion project is a partnership of QatarEnergy and ExxonMobil affiliates, two leading energy companies with an unrivaled record of producing, shipping and marketing natural gas globally.
