

**Project: Traveler Project**

**Location: Pasadena, TX**

**Owner: Next Wave Energy Partners**

**Contractor: Clough Group**

**MEIS Support/Supplies: November 2021 through Present Day**

- Project Traveler, is located adjacent to the Houston Ship Channel at Next Wave's 53-acre site in Pasadena, Texas.
- Next Wave will convert a portion of North America's growing ethylene supply to alkylate by utilizing licensed and commercially proven process technologies at the facility.
- Clough is currently completing the Engineering, Procurement, Construction, Commissioning (EPCC) and start-up contract for a petrochemical facility located in the Pasadena industrial complex, Texas.
- The project involves the delivery of a 28,000 bpd alkylate facility consisting of a new ethylene dimerization unit and a new alkylation unit to produce high octane alkylate for sale into the gasoline blending market.
