

# VENTURE GLOBAL LNG

**Project: Plaquemines LNG Project**

**Location: Plaquemines, LA**

**Owner: Venture Global LNG**

**Contractor: Bay Ltd**

**MEIS Support/Supplies: March 2023 through Present Day**

- Plaquemines LNG project is a natural gas liquefaction and liquefied natural gas (LNG) export terminal being developed in Louisiana, US.
- The LNG project will have a nameplate production capacity of 20 million metric tons per annum (Mtpa), while the peak production capacity is expected to be 24Mtpa.
- It also includes the Gator Express pipeline, which will include two pipelines linked to the existing interstate natural gas pipelines to deliver natural gas to the LNG project site.
- The project is being developed by Venture Global Plaquemines LNG, a subsidiary of Venture Global LNG, with an investment of \$8.5bn. The financial closure for the project is expected by the end of 2020. Construction of the LNG facility is expected to start in mid-2020, with the start-up of the terminal anticipated in 2023.
